**FROM THE HORIZON OF PRECISION,  
PERFECTION & EXCELLENCE,  
RISES A NEW DAWN IN  
PET PREFORMS & BOTTLES.**

### THE DAWN...

In the early eighties a new horizon began taking shape. Precision, perfection and excellence were the architects of this horizon in the packaging industry. And from there rose the sun...

Under the camaraderie of Mr. K. L. Mundhra, SUNRISE CONTAINERS LIMITED dawned upon the packaging industry. But it was only foresight and perseverance that turned the sails of the company from being the leading manufacturer of PVC transparent jars to becoming the undisputed leader in PET products, under the brand name, SUNPET. Needless to say, Mr. K. L. Mundhra, teamed up with Mr. D. K. Mundhra and Mr. D. P. Mundhra, have pioneered the growth of PET products in India since 1986.

Today the company is at the pinnacle of success, with a strong financial background, headquartered in the commercial capital of India - Mumbai and networked to its manufacturing units and distribution centers spread across the country. The roots of this success is still grounded in its Vision, Mission and Philosophy...

UNIT: India's largest exporter of PET Preforms, Bottles, Jars & Packaging Products.

### THE SUNRISE VISION

"To usher a dawn of excellence throughout the world by emitting the rays of quality, competence and value-performance, coupled with a shimmering brightness that braves every dusk."

### THE SUNRISE MISSION

"To deliver quality-focused, cost-effective and customized packaging solutions, with commitment to excellence, integrity, environmental stewardship and the goal to set benchmarks in the industry."

### THE SUNRISE PHILOSOPHY

"The best test of superiority and leadership is the power to get itself accepted in the competition of the market, backed by a broad vision and a resolute will to achieve."

### PHARMACEUTICAL SEGMENT

In 1998, SUNRISE became the first in the western region to introduce concept selling in the pharma industry and also the first in India to introduce the two-stage process and oil-free compressors for bottle blowing. Some of the most prominent features that have made SUNRISE a preferred choice among leading pharmaceutical companies are:

- Clean room facility
- Largest manufacturing capacity
- Better quality due to two-stage process
- Bottle blowing through oil-free compressors
- FDA approved raw materials and pigments
- Trained personnel
- Stringent quality checks

Apart from the above, dress codes for workers, allotment of separate rooms for separate activities, personal hygiene disinfection, medical check-ups, etc. are a regular affair. In safety and precaution, the company goes to the extent of even filtering drying and monitoring compressed air.
